

Contents

Preface	v
Rock Stability Analysis and Three Convergences of Discontinuous Deformation Analysis (DDA) <i>Gen-Hua Shi</i>	1
Modelling Dynamic Deformation in Natural Rock Slopes and Underground Openings With DDA <i>Y. H. Hatzor</i>	13
Study on the Formation Mechanism of Tanjiashan Landslide Triggered by Wenchuan Earthquake Using DDA Simulation <i>Wu Aiqing, Yang Qigui, Ma Guisheng, Lu Bo and Li Xiaojun</i>	27
A G Space Theory with Discontinuous Functions for Weakened Weak (W2) Formulation of Numerical Methods <i>G. R. Liu</i>	37
Concerning the Influenced of Velocity Ratio and Topography Model on the Result of Rockfall Simulation <i>T. Shimauchi, K. Nakamura, S. Nishiyama and Y. Ohnishi</i>	39
Development of Numerical Manifold Method and its Application in Rock Engineering <i>Guowei Ma, Lei He and Xinmei An</i>	47
Tensorial Approach to Rock Mass Strength and Deformability in Three Dimensions <i>P. H. S. W. Kulatilake</i>	59
Contact Algorithm Modification of DDA and Its Verification <i>Y. J. Ning, J. Yang, G. W. Ma and P. W. Chen</i>	73
DDA for Dynamic Failure Problems and Its Application in Rock Blasting Simulation <i>Y. J. Ning, J. Yang, G.W.Ma and P.W. Chen</i>	83
Study on Roof Caving Problem with DDA Method <i>Liu Yong-Qian, Yang Jun, Chen Peng-Wan and Ning You-Jun</i>	91
Indeterminacy of the Vertex-vertex Contact in the 2D Discontinuous Deformation Analysis <i>H. R. Bao and Z. Y. Zhao</i>	99

Complementary Formulation of Discontinuous Deformation Analysis <i>W. Jiang and H. Zheng</i>	109
Accelerated Block Sectioning Algorithm Based on Half-Edge Data Structure <i>Jian Xue</i>	119
A New Contact Method using Inscribed Sphere for 3D Discontinuous Deformation Analysis <i>Tae-Young Ahn, Sung-Hoon Ryu, Jae-Joon Song and Chung-In Lee</i>	127
Study on Failure Characteristics and Support Measure of Layer Structure_ Cataclasm Rock Mass <i>Guang bin Shi, Junguang Bai, Minjiang Wang, Baoping Sun, Ying Wang and Genhua Shi</i>	135
Stability Analysis of Expansive Soil Slope using DDA <i>Lin Shaozhong and Qiu Kuanhong</i>	145
DDA Simulations for Huge Landslides in Aratozawa Area, Miyagi, Japan Caused by Iwate-Miyagi Nairiku Earthquake <i>K. Irie, T. Koyama, E. Hamasaki, S. Nishiyama, K. Shimaoka and Y. Ohnishi</i>	153
Modelling Crack Propagation with Nodal-Based Discontinuous Deformation Analysis <i>H. R. Bao and Z. Y. Zhao</i>	161
Discontinuous Deformation Analysis for Parallel Hole Cut Blasting in Rock Mass <i>Zhiye Zhao, Yun Zhang and Xueying Wei</i>	169
The Analysis of Structure Deformation Using DDA with Third Order Displacement Function <i>T. Huang, G. X. Zhang and X. C. Peng</i>	177
Application of DDA to Evaluate the Dynamic Behaviour of Submarine Landslides Which Generated Tsunamis in the Marmara Sea <i>G. C. Ma, F. Kaneko and S. Hori</i>	185
3D DDA vs. Analytical Solutions for Dynamic Sliding of a Tetrahedral Wedge <i>D. Bakun-Mazor, Y. H. Hatzor and S. D. Glaser</i>	193
Application of Strength Reduction DDA Method in Stability Analysis of Road Tunnels <i>Xia Caichu, Xu Chongbang and Zhao Xu</i>	201

Micromechanical Simulation of the Damage and Fracture Behavior of a Highly Particle-Filled Composite Material Using Manifold Method <i>Huai Haoju, Chen Pengwan and Dai Kaida</i>	211
The Application of Discontinuous Deformation Analysis in the Slope Stability of the Expansive Soil <i>Lin Yuliang and Wei Lingjing</i>	217
Extension of Distinct Element Method and Its Application in Fracture Analysis of Quasi-Brittle Materials <i>Y. L. Hou, G. Q. Chen and C. H. Zhang</i>	227
A Comparison Between the NMM and the XFEM in Discontinuity Modelling <i>X. M. An and G. W. Ma</i>	237
Initial Stress Formulae for High-Order Numerical Manifold Method and High-Order DDA <i>Haidong Su and Xiaoling Xie</i>	247
Development of Coupled Discontinuous Deformation Analysis and Numerical Manifold Method (NMM-DDA) and Its Application to Dynamic Problems <i>S. Miki, T. Sasaki, T. Koyama, S. Nishiyama and Y. Ohnishi</i>	255
Stability Analysis of Ancient Block Structures by Using DDA and Manifold Method <i>T. Sasaki, I. Hagiwara, K. Sasaki, R. Yoshinaka, Y. Ohnishi, S. Nishiyama and T. Koyama</i>	265
Application of Manifold Method (MM) to the Stability Problems for Cut Slopes along the National Roads <i>Y. Ohnishi, T. Koyama, Kazuya Yagi, Tadashi Kobayashi, Shigeru Miki, Takumi Nakai and Yoshifumi Maruki</i>	273
Boundary Deformability and Convergence in the Higher-Order Numerical Manifold Method <i>D. Kourepinis, C. J. Pearce and N. Bicanic</i>	283
The Numerical Manifold Method and Extended Finite Element Method — a Comparison from the Perspective of Discontinuous Deformation Analysis <i>D. Kourepinis, C. J. Pearce and N. Bicanic</i>	291
Accuracy Comparison of Rectangular and Triangular Mathematical Elements in the Numerical Manifold Method <i>H. H. Zhang, Y. L. Chen, L. X. Li, X. M. An and G. W. Ma</i>	297

Development of 3-D Numerical Manifold Method <i>G. W. Ma and L. He</i>	305
Application of the Optimization for Rock Tunnel's Axis Trend by Block Theory <i>Yang Wenjun, Hong Baoning, Sun Shaorui and Zhu Lei</i>	315
Quarry Wall Stability Analysis Using Key Block Theory — a Case Study <i>Lu Bo, Dingxiuli and Dongzhihong</i>	325
Probabilistic Key Block Analysis of a Mine Ventilation Shaft Stability — a Case Study <i>Gang Chen</i>	343
The Support Design for Slope and Tunnel Engineering Based on Block Theory <i>Jiao Liqing, Ma Guowei, He Lei and Fu Guoyang</i>	351
Hereditary Problems in Long-wall Mining by Free Hexagons <i>P. P. Prochazka and Kamila Weiglova</i>	359
Analysis Of Large Rock Deformation Under High In Situ Stress <i>S. G. Chen, Y. B. Zhao and H. Zhang</i>	367
Gothard Base Tunnel: UDEC Simulations of Micro Tremors Encountered During Construction <i>H. Hagedorn and R. Stadelmann</i>	373
Discrete Modeling of Fluid Flow in Fractured Sedimentary Rocks <i>Wu Wei, Li Yong and Ma Guowei</i>	381
An Investigation of Numerical Damping for Modeling of Impact <i>T. Nishimura</i>	387
Development of Modified RBSM for Rock Mechanics Using Principle of Hybrid-type Virtual Work <i>N. Takeuchi, Y. Tajiri and E. Hamasaki</i>	395
High Rock Slope Stability Analysis Using the Meshless Shepard and Least Squares Method <i>X. Zhuang, H. H. Zhu and Y. C. Cai</i>	405
Numerical Modelling of Laboratory Behaviour of Single Laterally Loaded Piles Socketed into Jointed Rocks <i>W. L. Chong, A. Haque, P. G. Ranjith and A. Shahinuzzaman</i>	413
Distinct Element Analysis on the Stability of a Stone Pagoda at Mireuk Temple Site in Korea <i>H. Kim and S. Jeon</i>	421

Distinct Element Analysis of Staged Constructed Underground Cavern in the Vicinity of a Fault	429
<i>H. C. Chua, A. T. C. Goh and Z. Y. Zhao</i>	
Numerical Experiment on Thermo-Mechanical Behavior of Jointed Rock Masses under Cryogenic Conditions	437
<i>S. K. Chung, E. S. Park, Y. B. Jung and T. K. Kim</i>	
UDEC Simulation of Block Stability Analysis Around a Large Cavern	445
<i>A. Sookhak, A. Baghbanan, H. Hashemalhosseini and M. Bagheri</i>	
The Application of Meshless Methods in Analysis of Discontinuous Deformation	453
<i>M. Hajiazizi</i>	
The Optimum Distance of Roof Umbrella Method for Soft Ground by Using PFC	461
<i>Yusuke Doi, Tatsuhiko Otani and Masato Shinji</i>	
3DEC Investigation on Slope Stability at Norwich Part Mine	469
<i>S. G. Chen and B. Shen</i>	
Evaluation of Deformations Around a Tunnel by Using FEM, FEBEM, UDEC, UDEC-BE and CFS	477
<i>Rajbal Singh</i>	
Numerical Modeling of Undrained Cyclic Behaviour of Granular Media Using Discrete Element Method	485
<i>B. Ferdowsi, A. Soroush and R. Shafipour</i>	
A Fundamental Study on the SPH Method Application for Impact Response of RC Structural Members	495
<i>J. Fukazawa and Y. Sonoda</i>	
2-D FEM analysis of the Rock Fragmentation by Two Drill Bits	505
<i>S. Y. Wang, Z. Z. Liang, M. L. Huang and C. A. Tang</i>	
Determination Method of Rock Mass Hydraulic Conductivity Tensor Based on Back-Analysis of Fracture Transmissivity and Fracture Network Model	513
<i>Li Xiaozhao, Ji Chengliang, Wang Ju, Zhao Xiaobao, Wang Zhitao, Shao Guanhui, Wang Yizhuang</i>	
Numerical Simulation of Scale Effect of Jointed Rock Masses	521
<i>Z. Z. Liang, L. C. Li, C. A. Tang and S. Y. Wang</i>	

Influence of Cobblestone Geometrical Property on Equivalent Elastic Modulus of Cobblestone-Soil Matrix <i>M. Z. Gao, H. S. Ma and J. Zhao</i>	531
Comparative Studies of Physical and Numerical Modeling on Regular Discontinuities <i>Abbas Majidi, Hessam Moghaddam Ali and Kayumars Emad</i>	539
Probabilistic Assessment of a Railway Steel Bridge <i>B. Culek, V. Dolezel and P. P. Prochazka</i>	547
An Analysis of Dynamic Tensile Fracture in Concrete Under High Strain Rate <i>M. Kurumatani, S. Iwata, K. Terada, S. Okazawa and K. Kashiwama</i>	555
A New Equivalent Medium Model for P-Wave Propagation Through Rock Mass with Parallel Joints <i>G. W. Ma, L. F. Fan and J. C. Li</i>	563
Stability Analysis of Transformer Cavern and the Corresponding Bus Duct System at Siyah Bishe Pumped Storage Power Plant <i>Abbas Majidi, Kayumars Emad and Hessam Moghaddam Ali</i>	573
Process Zone Development Associated with Cracking Processes in Carrara Marble <i>L. N. Y. Wong and H. H. Einstein</i>	581
Simulation of Stress Singularity around the crack tips for LEFM problems using a new numerical method <i>G. R. Liu and N. Nourbakhsh Nia</i>	589
Modeling of Three-dimensional Hydrofracture in Permeable Rocks Subjected to Differential Far-field Stresses <i>L. C. Li, C. A. Tang, G. Li and Z. Z. Liang</i>	599
Crack Propagation Analysis using Wavelet Galerkin Method <i>S. Tanaka, S. Okazawa and H. Okada</i>	609
Simulation of Multiphase Fluid Motion in Pore-Scale Fractures <i>M. B. Liu and J. Z. Chang</i>	617
An Analysis of Model Tests on Rock Cavern Damage Induced by Underground Explosion <i>Zhang Xingui, Ma Guowei, Wu Wei, Yan Lie, Li Mangyuan and Cheng Qingsheng</i>	625
Microscopic Numerical Modelling of the Dynamic Strength of Brittle Rock <i>G.-F. Zhao and J. Zhao</i>	633

Fault Studies and Coal-gas-outburst Forecast in Coal Mines <i>H. Q. Cui, X. L. Jia, Z. P. Xue and F. L. Yang</i>	641
Suggestion of Equations to Determine the Elastic Constants of a Transversely Isotropic Rock Specimen <i>Chulwhan Park, Chan Park, E. S. Park, Y. B. Jung and J. W. Kim</i>	647
Numerical Analysis of Deep Excavation Affected by Tectonic Discontinuity <i>L. Mica, V. Racansky and J. Grepl</i>	661
The Finite Element Analysis for Concrete Filled Steel Tubular Columns under Blast Load <i>J. H. Zhao, X. Y. Wei and S. F. Ma</i>	669
Numerical Simulation of Performance of Concrete-Filled FRP Tubes Under Impact Loading <i>C. Wu, T. Ozbakkloglu, G. Ma and Z. Y. Huang</i>	675
Estimating Hydraulic Permeability of Fractured Crystalline Rocks Using Geometrical Parameters <i>R. Vesipa, Z. Zhao and L. Jing</i>	685
Mutual Effect of Tectonic Dislocations and Tunnel Linings during Tunnelling <i>K. Weiglová and J. Boštík</i>	693
Author Index	703
